

**Amendments to the Specification**

After the paragraph that ends on page 7, line 30, and before the paragraph that begins on page 7, line 32, please insert the following new paragraph:

Referring to FIGS. 3 and 5, it can be seen that neither the projection 10 nor the retaining portion 12 extend above the plane defined by the upper surface of the body 2 or below the plane defined by the lower surface of the body 2. As a result of this configuration, the projection 10 and retaining portion 12 are less likely to snag on adjacent fittings. As used herein, when it is stated that the projection 10 and retaining portion 12 are in substantially the same plane as the body, it will be understood to mean that neither the projection 10 nor the retaining portion 12 extend through the planes defined by the upper and lower surfaces of the body 2.
